Arcata 2826 Dual Mode Endpoint

ARCATA 2826

The Arcata 2826 Dual Mode endpoint supports Digital, CIP-D and SIP Phone modes. With features such as a large, interactive display and multiple programmable keys, it is ideal for system attendants, group leaders, executives and power users wanting the flexibility of having access to multiple lines and stations.

With dual mode capability, the Arcata 2826 is the perfect solution for:

- VCSe 2000/9000[1] customers who simply want new, updated phones
- VCSe 2000/9000 customers wanting to migrate to IP technology
- IT Managers wanting forward compatibility in preparation for a move to IP
- Purchasing agents wanting to manage spare inventory with a single, multi-purpose handset

Arcata 2826 Dual Mode features:

- Multiple programmable keys for lines and/or features
- Available BEM to expand line/feature keys
- 4 interactive soft keys
- Full-duplex speakerphone
- Much more!

SIP. SIMPLIFIED.

Not only do Arcata SIP phone endpoints offer a rich feature set at an affordable price, they continue to ease the transition to, and use of, SIP communication.

BUTTON EXPANSION MODULES

- 38-button desi label model
- Buttons individually programmable as line or feature keys

[1] *Teltronics 20-20 platforms are now branded VCSe 2000 & VCSe 9000.*
